Who are we

TEACHZO is a Saudi technology company specializing in the development of digital solutions and smart operating models that empower individuals and organizations to manage their services and assets with greater efficiency through advanced technological systems.

At **TEACHZO**, we focus on building flexible digital operating ecosystems that support the transition toward the modern operational economy —where value is driven not only by owning resources, but by managing, operating, and sharing them intelligently to maximize performance, utilization, and impact.
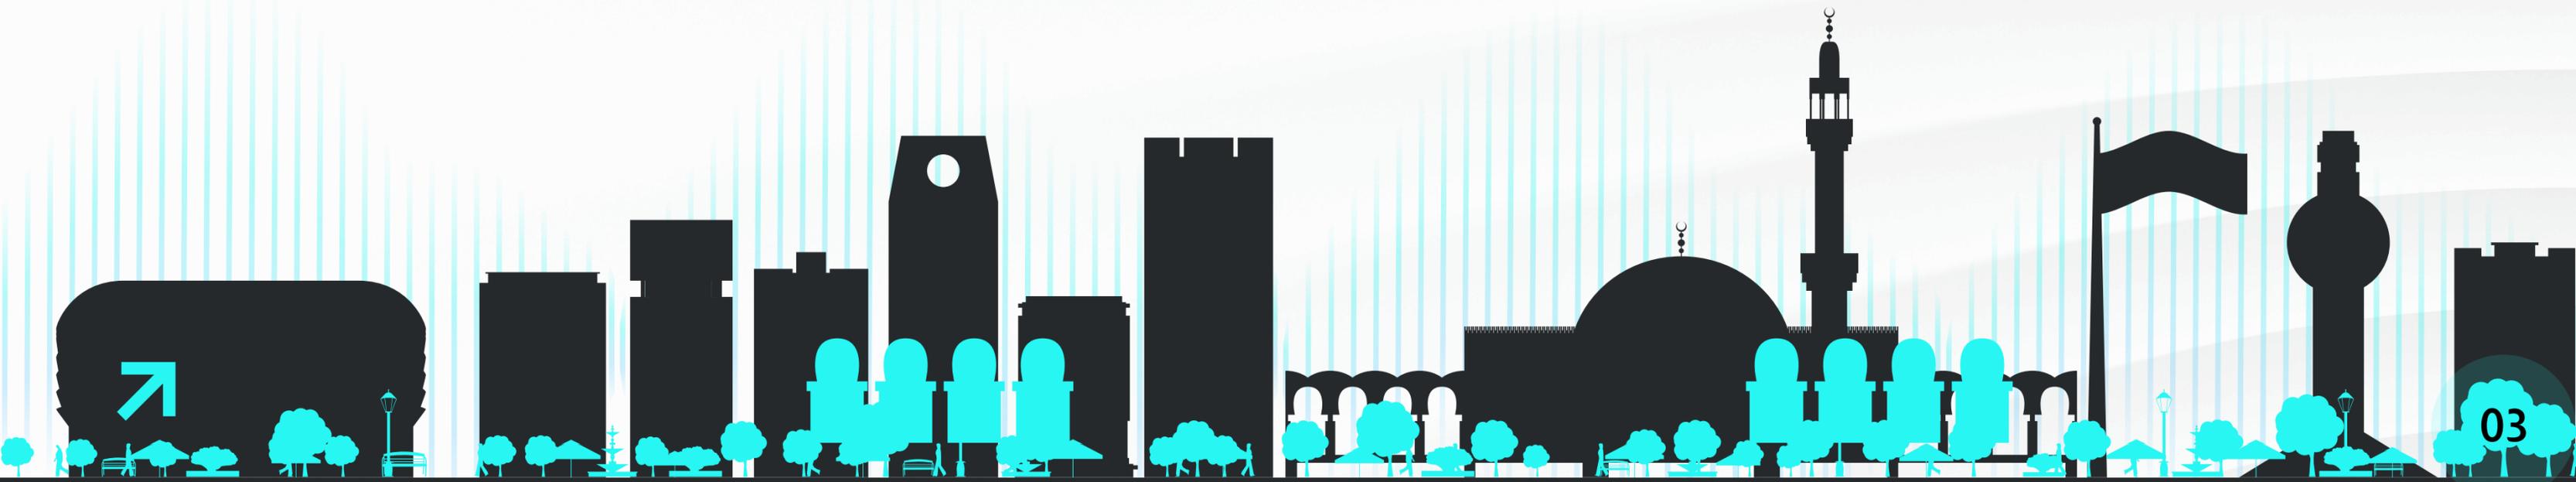

Vission & Mission

Vision

To be the leading digital partner in the Kingdom in innovating self-service solutions through advanced technologies that redefine service accessibility, enhance customer experience, and align with future aspirations

Mission

We strive to deliver flexible and effective technological solutions built on strong organization and strategic planning, precisely responding to clients' needs and contributing to improving their operational efficiency and service quality.

Values

01 Innovation & Development: A continuous pursuit of new and meaningful ideas that create real impact.

02 Transparency & Clarity: A strong belief that trust is always built on honesty and clear communication.

03 Customer Focus: Designing technological solutions with great care to align with each client's aspirations while addressing their unique needs and individuality.

Services

Techzo is a Saudi company specializing in self-service solutions and digital products, with a mission to empower businesses and simplify service delivery through modern technologies tailored to market needs.

Its key projects and offerings include:

"Masahati" Project (Coming Soon): An innovative digital platform and application designed to connect owners of unused spaces— such as offices, rooms, parking areas, small warehouses, and vacant retail shops—with individuals and businesses seeking flexible space solutions.

Power Bank Rental Stations: Providing smart solutions and stations for renting power banks, enabling users to conveniently charge their devices and overcome low-battery challenges.

Emdad Platform

About the Emdad Platform

Emdad is a smart digital platform that offers portable charger rentals through a network of stations located in key areas, enabling users to charge their devices conveniently on the go. Users can find the nearest station, rent a power bank within seconds via the app or QR scan, and return it to any station in the network.

Building the technological infrastructure by TEACHZO.
Emdad translates this framework into actual digital operations that enhance business efficiency,

What Does Emdad Platform Offer?

Return the charger at any station within the network, providing high flexibility in usage.

Charge on the go, ensuring users stay connected and productive without interruption due to low battery.

Fast rental via smart QR code scanning without complicated procedures.

Locate nearby charging stations through the app for easy access to the service at any time.

Contact Us

We believe technology is an integrated system that reshapes how organizations operate and supports growth, efficiency, and sustainability.
